The History and Grounds

The Burdette Gallery was originally completed in 1980 by Paul Burdette on his country property in Orton, less than an hour's drive north of Toronto, west of Orangeville, to show not only his award-winning carvings, but the original works and limited edition prints of artists from around the world. The current owner built on the traditions of the Burdette's and enhanced the natural beauty of the property.

The Burdette Gallery is set on 65 acres of whispering pines and rolling meadows near the Niagara Escarpment. There are trails through the woods, past the meadows and between the three ponds. The property attracts abundant wildlife to its peaceful setting.
